

## Contrabando Lammy Titles

Version 3.0

All Contrabando lammies are 'rip on use' versions, with titles as shown to allow IC identification, without requiring a lore skill. Along with the advantage of not knowing exactly what they do immediately (stronger - purer or contaminated versions anyone?) this also makes it much easier to introduce new Contrabando lammies as it would be purely IC information to identify them without requiring additional lore sheet entries or Almanac appendix D additions.

### Liquid

Bright, Sweet, Bitter, Spicy, Sticky, Viscous, Dark, Sour
